Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 2, and 14 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admitted prior art of record.

The prior art of record (Figures 1 and 2) discloses a test apparatus comprising a housing 200, a drive cam 202, a drive shaft 206, an engagement cam 210, an engagement shaft 212, and a detent/safety release mechanism 224.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12, 13, 20, 32, 33, and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art of record in view of Smith.

The prior art discloses a test apparatus as discussed supra, but does not disclose a remote operator, a sensor, and a controller. However, attention is directed to

Art Unit: 3751

the Smith reference, which discloses a similar test apparatus including a remote operator 29, a sensor 27, and a controller 30 for remote operation of the apparatus. It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ a remote operator, a sensor, and a controller on the prior art test apparatus in view of the teachings of Smith for remote operation of the apparatus

Allowable Subject Matter

Claims 21-31 are allowed.

Claims 3-11, 15-19, 34-36, and 38-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Roberts and Owen references disclose similar test apparatus.
